

# SHELBY ADVOCATES FOR VALID ELECTIONS

[SaveTheVote.US](https://www.savethevote.us)

**'Shelby Advocates for Valid Elections' (S.A.V.E.) is a non-profit non-partisan citizens' group active in preserving, advancing, and protecting the integrity of our votes, and to advocate for verified and valid elections.**

We are battling with the State Election Commission and the state's local Election Commission to rid our elections of our current insecure machines, systems and processes. The next system they purchase should be secure. They have not agreed to a secure system.

## **Our key efforts to date include**

- We've done a ton of research.
- We produced a 50-page report about the Shelby County Election Commission, backed by evidence at [votingonthinice.com](https://www.votingonthinice.com).
- We analyzed voting machines and methods and are recommending voter verifiable paper ballots that are filled out by the voter.
- We are opposed to any devices interposed between the voter and the scanner.
- We are opposed to voting machines that use wifi.
- We are opposed to the use of barcodes on ballots which can be hacked and negate the voter verification.
- We have filed a Civil Rights lawsuit in the US District Court seeking new voting operations that prevent hacking.
- Experts agree that reform is needed. What we do today has local, state and national implications.
